Steve,
Going through my email and I do not know if I replied to this request or not. If this is a duplicate confirmation please ignore this email. In regard to the restoration approach for Removal Area 3A and Island 2, U.S. EPA is in agreement with MDNR and USFWS in modification of Area 3A and Island 2 as indicated in your 11-04-09 email and as discussed on October 21.

If you have any questions please feel free to contact me.
Thank you.

Subject: Plainwell No. 2 Dam Area TCRA modification

Sam:

As we discussed at the stakeholder meeting on October 21, 2009, the restoration plan for Removal Area 3A and Island 2, as shown on Drawing R-1.5, calls for backfill to be placed on both sides of the river. After our review at that meeting of the removal depths shown on Drawing

SR-1.5, it was agreed that leaving these areas at their finished removal grade, without placement of backfill, would be acceptable to the trustee agencies at the meeting (MDNR and USFWS) and also to USEPA. Eliminating the backfill requirement will help reduce unacceptable erosion of these areas, and will also expedite the project schedule. Topsoil would still be placed if needed to support vegetation.

Please respond to this email message and confirm you are in agreement with this minor modification to the project. Thanks.
